SALE CONSULTANTS

Glasgow Stockyards 406-228-9306

TERMS AND CONDITIONS

Cattle will sell under the suggested Terms & Conditions of the American Angus Association and the Red Angus Association of America.

SALE ORDER

Bulls will sell in Lot Tag Number order.

ONLINE BIDDING

Bidding can take place on www.cattleusa.com or SuperiorLivestock.com. Please pre register a couple days before the sale. But last minute is welcome also.

SEMEN INTEREST

Retaining 1/3 interest in all bulls.

WATCH BULL VIDEOS AT

BillPelton.com • SuperiorLivestock.com

CATALOG PRINTING & MAILING

406-654-1285
155 S 1st Ave E, Malta, MT
mooresprinting@itstriangle.com

LIABILITY

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The owners, sale management firm, and the sales staff assume no liability for property loss or any accident that may occur.

BULL INSURANCE

Trudeau Insurance, Ray Trudeau 605-996-3106

LOSS OF USE POLICY

Koss Angus / Martin Red Angus / Rising 4 Cattle will pay 4% of sale price towards the Stockman Insurance policy. Balance of policy will be paid by the customer. If the customer chooses to decline the policy, Koss Angus / Martin Red Angus / Rising 4 Cattle have no obligation to cover any losses due to injury, sickness, or death. Koss Angus / Martin Red Angus / Rising 4 Cattle guarantee all cattle to be sound the day of the sale.

TRUCKING

Provided free in the state of Montana and at cost for outside of Montana. *KOSS ANGUS is offering \$50 if you haul your bulls home sale day.*

BULLS WINTERING

Bulls will be hauled immediately after the sale.

BIDDING

The Auctioneer in charge will settle any and all disputes as to bids, and his decisions on such matters will be final. Information noted on the auction block takes precedence over information in the catalog and supplement sheets.

ABSENTEE BIDS

We hope everyone can attend the sale in person, but for those of you who can't attend the sale, they can participate by calling Kendall, Heather or David before sale day. Sale day you can try to reach us or call Glasgow Stockyards.

HEALTH & PERFORMANCE

All bulls passed BSE, 2 rounds Multimin, 2 rounds Fusoguard (footrot vaccine), Pyramid 5 Presponse, Bar Vac 7 Somnus and poured. Vira Shield 6 (Martin Red Angus / Rising 4 Cattle)

VET SERVICES

Dr. Bobbi Knudsen at Hi Line Veterinary Service did the BSEs for Martin Red Angus / Rising 4 Cattle; Dallas Maxwell at Maxwell Herd Health did Koss Angus.

ROUGH COUNTRY BREEDERS

SCHEDULE

8:00AM Bulls available for viewing at the Glasgow Stockyards

11:30AM - Lunch provided by Doris Ozark

1:00PM - Sale

Dear Customers and Friends,

Welcome to the 9th annual Koss Angus Bull sale. We are blessed for all the support from our buyers, we could not make this possible without you. We believe here at Koss Angus that you shouldn't be working for your cattle but that your cattle should be working for you. We consider it a privilege to raise seed stock that will be adding genetics to your cow herd. Here at the ranch we strive for cattle that can handle the unpredictable climate of Northeast Montana, whether it be the harsh brutal winters, or the hot and dry summers. We try to raise cattle that not only survive in these conditions, but will thrive. We have built our cow herd with genetics we feel will get the job done, cattle with low inputs, good maternal instincts, solid feet, good fertility, and all while maintaining good growth and performance. Thank you for the interest in our program. We believe you will be pleased with the bulls in this year's sale. If you have any questions or just want to visit don't hesitate to call. I would like to make a special thanks to my parents (Kevin and Brenda), my wife (Iris), and to all the surrounding neighbors. We wouldn't be able to make this possible without you.

Sincerely, *Kendall and Iris Koss*

406.654.7695 · 2346 Fourchette Bay Rd · Malta, MT · kosskendall@gmail.com

WELCOME, We truly appreciate your interest in our program. The bulls performed better than I anticipated, especially considering the drought we faced this past year. Because of that we have decided not to sell any heifers at this sale. However we will be offering commercial bred heifers this coming fall. I would like to sincerely thank everyone who helped throughout the year to get things done. I'm sure I may forget someone, so please accept my thanks in advance. A special thank you to Dylan and Jake Brown, these two showed up with maybe an hour or two notice to help me accomplish what I was needing to get done. Your support is awesome. Thanks Ali Jo Merritt with Superior Livestock for videoing the cattle for Martin Red Angus / Rising 4 Cattle. Of course, David, Micaela, Nova and Aspen. The girls are always ready to get the cows in and ride the four wheelers. Kyle Kluck for his help setting the cows/heifers up for AI-ing, even if it was some weird hours. You are all appreciated. Thanks again to everyone who supports our program.

Sincerely, *Heather Martin*

406.654.7664 · 2405 Martin Rd · Malta, MT · heather_martin1990@hotmail.com

Welcome to our Annual Production Bull Sale! We are truly grateful you've taken the time to be here and to show interest in our program.

For the past 12 years, we have been proud to raise and market quality seed stock, continually working to improve the genetics, performance, and consistency of our herd. Our goal has always been simple - to produce functional, reliable cattle that go out and work for commercial cattlemen while adding value to their operations.

This year's offering of registered Black and Red Angus bulls represents years of careful selection, disciplined breeding decisions, and a commitment to structural soundness, maternal strength, growth, and longevity. These bulls are developed with longevity and real-world performance in mind. We stand behind them and are confident they will go to work and make a positive impact in your herd.

We believe in building relationships just as much as we believe in building good cattle. Whether you are a longtime customer or joining us for the first time, we appreciate your trust and your support of our program.

Please don't hesitate to visit with us about the offering - we enjoy talking cattle and helping you find the right fit for your operation. Thank you again for being here and for supporting our program. We look forward to seeing you sale day!

Sincerely, Rising 4 Cattle - *David, Micaela, Nova and Aspen Score*

COMMERCIAL BULL 735

Calved 02/26/25

SIRE IS OCC CORTEZ 819C

Birth Wt
86
Wean Wt
735

Leading off the 2026 Koss Sale is a stout smooth made Cortez son. He is a commercial bull as his dam is the only cow I could not clear the registration papers on. I purchased this group of cows from Jocko Valley Cattle in 2023 and they have fit in the herd very well and have produced some great heifer and bull calves. This is a bull with some great fleshing ability that will create some tremendous females that you'll want to keep in your cow herd. This bull was calved at 86 lb and weaned off the cow at 735 lb. Recommend use only on Cows. Scrotal measurement as of 3/4/26 - 33

Lot 2 is another Cortez son that packs a little more frame than some of his siblings but has some good muscle and depth along with his slightly bigger frame. This is a bull that catches your eye in the pen of bulls he has excelled since birth as he is our biggest weaning bull coming off the cow at 740 lb. This bull will produce some big stout calves that will add pounds for you in the fall. Recommend use only on cows. Scrotal measurement as of 3/4/26 - 38

Lot 3 another Cortez son that is very well put together he has tremendous depth and thickness along with good calving ease with a +10 CED and negative BW if you watch your heifers in the spring you shouldn't have any issue using him on heifers. This is a calving ease bull that would go great with heifers or cows and has growth and performance behind him. Scrotal measurement as of 3/4/26 - 36

★ KOSS ANGUS ★

Lot 4 is the first bull in the sale out of our Redland Foundation son purchased from Bryan Pike in the 2024 Milk River Angus sale. This bull is one of my favorite bulls in the pen he was one of the last calves born and calved out of one of the smallest and stoutest cows on the ranch and being one of the last calves he has excelled through the summer as he weaned off the cow at 635 lb. This is a stout bull that stands very correctly and catches your attention immediately. I expect to see great things from this bull and your definitely going to want to keep his heifers as replacements. I would recommend him be used on cows. Scrotal measurement as of 3/4/26 - 35

Lot 6 is a son out of Sinclair Justified L510 that we purchased in the 2024 Sinclair Cattle Company production sale. The dam of this bull is a Redland Ranger granddaughter and is a picture perfect momma cow. This is a bull I would use on Heifers he isn't super high on CED but shouldn't have any problems he was born at 72lb but weaned off his young mom at 635lb. Who says you can't have performance with calving ease? Scrotal measurement as of 3/4/26 - 35

Lot 7 is a Cortez son that is a stout made moderate framed bull. This a bull that has great fleshing ability and will make thick stout calves that will excel in harsh environments. This bulls granddam is the dam to Lot 8. This bull calved at 75 lb and weaned off the cow at 615 lb.

Would recommend only use on cows.

Lot 8 is another Cortez son with a stacked pedigree in my opinion tracing back to N Bar EXT and N Bar Shadow on the dam side and tracing back to OCC Rear End and OCC Paxton through Cortez this is a bull that has generations of great cattle behind him. He is a smooth bull with lots of length a great topline and stands very correctly. This is a bull that's going to have good travel and be able to cover the big rugged pastures. This is a bull I think could be a great herd bull and would be a great addition to add to anyone's cow herd. This bull weaned off at 695 lb. I would recommend this bull be used on cows.

Is a calving ease Cortez Son that I would recommend for heifers if you watch them. This bull is out of a coming 4 year old Redland Ranger granddaughter. This is a very well built bull that comes from a thick long stout cow. This bull was born at 80 lb and weaned off the cow at 620 lb. This is a bull that would give you good calving ease to use on Heifers but also packs some punch if you want to turn him out with the cows.

Lot 11 is a Justified son that is a sleep all night heifer bull. This bull was raised on a first calf heifer that was bought from Hould Angus in the 2024 sale as a replacement heifer calf. This is a young cow that I really like the looks of in terms as size and shape I expect good things going forward with this cow and I expect good things from this bull as well. He is a very proportionate bull with a moderate frame and good depth and muscle. Being on a 2 year old heifer this bull was a little behind the other bulls in terms of weaning weight and development but this is going to be a bull that should excel going forward and would be a great heifer bull to add to your herd. A calving-ease standout with extra punch! 57N came light at 82 lbs and surged to a 708 lb adjusted weaning weight, proving he combines sleep-all-night calving with performance you can market. His strong growth profile and balanced maternal traits make him a dependable option for heifers without giving up weight. He's a easy calving bull that still pushes the scale down hard at weaning. Scrotal measurement as of 2/26/26 - 35

Martin Red Angus / Rising 4 Cattle

A rugged, performance-minded Cornerstone son designed for mature cows. With a 93 lb birth weight and a 586 lb adjusted weaning weight, 44N brings added frame, muscle, and real-world power to a calf crop. Backed by strong, time-tested maternal lines, he offers dependable genetics built for longevity and substance. He's a stout cow bull built to add stretch, scale, and pounds at marketing time. Scrotal measurement as of 2/26/26 - 35

Starting off this years sale are Supreme bulls. We have quite a few of them available. I am excited to finally see the breeding decisions and matings we have been putting together come full circle. This bulls maternal side goes to Red Bear out of the Duff program and she gets to carry the Martin name to add consistence and strength to the pedigree.

Here's a heifer bull that checks the boxes and brings the extras. R4C 21N came light at 74 lbs and posted a strong 600 lb adjusted weaning weight, proving he doesn't sacrifice performance for sleep-all-night calving ease. Calving ease up front with real-world performance behind him—that's the kind that keeps you smiling at branding time. With a 12 CED and negative BW EPD, he's built for heifers while still offering solid growth numbers (68 WW, 111YW). Backed by the Six Mile Syringa, a cow family, this bull combines maternal strength, carcass merit, and balanced profitability. A dependable heifer bull that will add pounds and consistency to your calf crop. The sire of this bull is going to be Red Six Mile Showman 87L or Lincoln 106H waiting on DNA to confirm.

Here's one that ought to get your hand in the air. Rising 4 Malbec 8N is the kind of heifer bull that doesn't just promise calving ease - he delivers performance to go with it. Sired by the Malbec line and backed by proven Six Mile and Hot Wire genetics, this bull brings pedigree punch with real-world numbers. He's balanced, complete, and backed by maternal strength that should leave you a set of broody, long-lasting daughters. If you're looking for a heifer bull that won't just get calves here easy but will push the scale down hard and add value from pasture to rail - Lot 27 deserves a long look sale day. Turn the volume up - this ones built for the cow herd!
Rising 4 Supreme 46N is a power bull. Coming in at 95 lbs a posting a stout 650 In adjusted weaning weight, he's designed for mature cows and built to add pounds in a hurry. If you sell by the pound - and who doesn't- this is the kind that makes sale day more fun. 46N brings muscle, shape, and performance. He's the type that will stamp his calves with extra body and feeder appeal. If you need a bull that will flat out add performance, stretch your weaning weights, and leave a set of rugged, productive daughters behind, look no further than lot 29.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
