GENERAL HEALTH
All bulls will have a general health and fertility exam, performed by a licensed veterinarian, prior to the sale. All bulls are sold as guaranteed breeders. Heifers are guaranteed open and have been Bangs vaccinated, and had preg guard 10. For revaccinating bred cattle always use a killed vaccine. Health certificates will be obtained for interstate transportation, if necessary. Arrangements for any other health requirements will be made sale day, according to terms agreed upon by both buyer and seller. All semen and bull soundness exams performed by Dr. Lane Schmidt DVM.

TERMS OF THE SALE
Terms of the sale are cash. All settlements will be made with the clerks of the sale immediately following the sale and before the cattle are released. See additional terms and conditions on the inside back cover of this catalog.

BRAND INSPECTIONS
Brand inspections will be available at the yards on sale day.

HOTELS & ACCOMMODATIONS
Cottonwood Inn & Suites
1-800-321-8213
www.cottonwoodinn.net
Campbell Lodge
406-228-9328
www.campbelllodge.com

GUARANTEES
All bulls are sold as guaranteed breeders. All heifers are sold guaranteed open. Additional terms and guarantees are included in the terms and conditions at the back of the catalog.

DELIVERY
Free delivery on bulls for the first 300 miles. All other deliveries at cost. There is a $50 per head rebate on bulls taken home on sale day. Any animals left for delivery will be delivered from the yards the day after the sale, or returned to the Seller’s ranch to be delivered at a later date in accordance with the Seller, or picked up by the Buyer in accordance with the Seller. There will be no free delivery on heifers, arrangements need to be made or they will be delivered at cost.

ABSENTEE BIDDING
Absentee bidding may be made in confidence with any representative listed and will be handled in the strictest of confidence. Announcements from the block take precedence over printed matter in this catalog.
Welcome to the 16th Annual Bowles J5 Reds Production Sale.

Sometimes in life we just have to slow down, and take in what is truly surrounding us, the delicate yet resilient balance that exists between all living things. Nature! Where do we really fit in, humans are both a part of and separated from the Natural world, at least most of us are. When you stop and really think of it Farmers and Ranchers are one of the only groups to truly live amongst nature. With life, death, and re-birth being such an integral part of our existence. We have a unique perspective on the world that few other people can ever know. So be thankful for the pain and the struggle to keep those family farms and ranches surviving. Everyone knows that this business has never been easy. The struggle and the perseverance of those that came before us has afforded us the opportunity to take up the mantle. To find a better way, to blaze our own trails forward, and to be the stewards we strive to be. For America!

As far as the cattle go, we are constantly striving to produce the most trouble-free herd of cows that we can. We all know that there has yet to be a perfect cow or bull, but hell that’s half the fun! Maintaining an appropriate balance of traits that are of the most importance for your’ marketing ability, and environment is the key to lasting success.

To start: Calving Ease, both Direct and Maternal, and a “Good Moorea” to make calving season less stressful. Which leads to better breed back and more live calves, oh and less work!

To Continue: Having the grow and eye appeal to sell those top steers, and heifers that will top the market. Heifer’s that are fertile and sound with the proper amount of femininity and muscle pattern.

To Finish: How long do you have a productive cow working in your herd? The best sustained value to your program is longevity. The value difference between an open 4 or a bred 6-year-old is tremendous.

Thank you for looking to Bowles J5 Reds to further your program.
A big THANKS to Stockman Bank for sponsoring our lunch this year!

CALVING SUPPLEMENTS
Last trimester and calving to breed-back interval is the most critical time for cow nutrition. Vitamin and mineral supplements support:
- Reduced calving problems
- Newborn calf vigor
- Improved colostrum quality
- Overall calf health
- Improved breed-back

Bio-Mos
Fed 45-60 days prior to calving through turnout will reduce calf scours and improve calf health. Available in most products.

Granular mineral - Bio Range and Blueprint both offer 100% organic (chelated) trace minerals for complete absorption, with no antagonistic effects.

Crystalyx - molasses based lick tubs containing protein and vitamin and mineral package.

Cake and Pellets
- Bulk or Bagged
- 16%-30% Range Cake
- Calf grower pellets
- Bull developer pellets

4-H Market Animals
Showrite feeds and supplements
- Beef
- Swine
- Lamb

YOUR FORAGE SEED SOURCE:
- Alfalfa
- Grass
- Grazing Corn
- Cover Crops
- Annual Forages
- Grain and Silage Corn

Marigold has been a standout throughout the summer, and she has the cow family to back up her more moderate thick and dense made frame. The L172 cow is foundation and is the cow family behind Thriller C147. Sometimes the best cattle don’t have the highest #s.

Yes, it is that same Rose cow family as the lot 1 heifer with a little more frame, she is destined to make a productive cow for the long term. If longevity is a priority in your program this heifer should make your list. With all of the smaller type cattle around it is important to maintain some good old-fashioned frame in your herd!

This is a ¾ sister to the lot 13 bull and is quite special in her own right. She will impart her true power into her progeny and you can look for her to bring added thickness and muscle along with frame depth and dimension.

Can you say soggy anyone, anyone, are you there? Paprika is a heifer that brings together a lot of our favorite breeding. She takes the great built-in balance of our program and holds it in a very powerful package. If you don't feel maternal calving ease is a value to the cattle business, then you must either enjoy pulling calves or live in a barn. The less you touch them the happier they will be.

Mom and sister both have bulls in the sale. This outstanding brood cow prospect is sure to make a very solid momma cow. I made my sale sort and then went back in to torture myself just a bit and offer these Take-Your-Pick lots that are some of our top cow prospects. At least I get to bring one of the two heifers back home with me.

Why would I even think of selling this heifer? This is the reason I didn’t want to do this, who talked me into it? It was Dad! Go ahead take your pick she isn’t really that good anyway, what do I care. (me crying a little) Just do it already. (me openly weeping). This is fun right. Waaah!

His dam 620 directly stacks two of our most influential cow families in Glorylass 8137 & Lola L039, along with one of our best cow producers in Mats Signal. You don’t need to read his pedigree to realize there is greatness in this bull, just come take a look. He is a ¾ semen interest and full possession.

Did anyone notice that his mother is an instrumental piece of our cow herd. She is now also 13 years old and still producing. Specialist is the Old Man’s pick of the bulls this year as he excels in Dad’s favorite things; length and style, while having a nice level top and a nice deep build. He is a heck of a back up plan behind lot 11, lock and load folks.
When they start at 97 lbs this is what you want them to look like when the get to this age. Exceptional muscle pattern with a wide top and amazing style with an incredible pedigree to top it off. If you are breeding cattle to make money then take a hard look at what this bull is gonna do for you.

Ok so I did not expect this girls first calf to end up like this, he just keeps getting better all the time. Big John is the best combination of his outstanding young sire and the Beckton program built on cattle out producing their frame. She produced her first herd bull on her first try, the future looks pretty bright, like a light from up above!
Who knew that when you breed cattle that you like you can still end up on the top end some important epd categories like calving ease, maintenance, and stay. All while still achieving a balanced growth rate. Maybe you should be after Thriller Gold.

This is a very good son of Big Shooter that we obviously used on our heifers last year. If he keeps stamping calves like Big Shot 0027 you might want to pick one up at this sale because they are going to be sale toppers in the years to come. Great long and thick made golden colored cattle I have this dam as a Thriller C147 but RAAA does not.

If you don’t want to produce cattle that calve at 85 wean at 737 and roll on to an 1101 pound yearling weight, than there is no pleasing you. If you notice that some of the best cattle keep coming out of a lot of the same cow families. Maybe that is a good place to start, you know with good cows.

I like these Spartacus calves, and I am unsure why his epd’s fell so far back. We have seen consistent performance and good growth from both years of Spartacus progeny and 0012 is out of a 106 mppa momma that is now 7 years old.
This guy is really good.

When I asked myself what model of Cadillac each son of C43 would be, there was no doubt about it. Maybe take a garder at the cow family again because here is a way to both improve your long-term sucess of your cow herd while also increasing weaning weights in the short term.
Here is another son of DKK Complete 887 with tremendous length thickness and style. If you are looking for a little more frame and good disposition I like this bull a lot.

Compound is one of the most physically impressive bulls in the offering with a super thick top, and tremendous muscle pattern. He is also dark red and kind of knows that he’s special.

Calving ease to me does not mean that you must have tiny calves. If you take a look at our program, even our heifers are calving out under range conditions, so maternity along with calving without help is the raw basis building program, even our heifers are calving out under range conditions, so maternity along with calving ease.

Yes, I do believe that I like what Merlin Pride is bringing to the table for our program. His sons and daughters are showing solid growth, dimension and style across the board.
Out of a new coming 13 year old sound to the ground Lancer cow this is a really nice calving ease prospect. I think a great deal of the sire here, he has great top and length and crossed very well on to our Lancer daughters.

If you want a heifer bull with tons of style and finishing type growth this is about as good of a calf as we have to offer. He does have a bit of fire to him, and his calves should have some get up and go.

We are not shooting for 53 pound birth weight calves, but this guy had plenty of juice and put together some respectable weights at weaning and yearling.
Ok you will just have to ignore may cow naming discrepancy on this guy. He is what we expect from the Thriller sire group lots of style and thickness. This bull also comes with a pretty sweat disposition.

If want to capture a great mother cow in action you could go ahead and watch her work and this pedigree is stacked to the hilt with more of the same. I will say again we calve out in the open and let these ladies work it out on their own, maternity doesn’t just happen by accident.

You cannot make old cows they have to make it there on their own. Cattle built on a solid foundation are more likely to last for as long as we want them to. Fertility and structure are a dang fine place to get started.
Another Thriller that should make a heifer bull. If you don’t have faith in small head and smooth shoulders than I may not be able to help you.

This is a very attractive, dark red son of Cadillac C43 I must have been on the wrong line naming cows that year doing. If you want a bull with tremendous balance, he is it. He had an ear infection we treated that slowed him down a bit this winter, but he is alright now.

Well you know what they say, “you can’t put them all first.” This Cadillac son is rock steady with a tremendous total shape. He may be a bit more of a cowboy type of bull than some other bulls in the sale. He does like it when Sydney scratches his head though.
Top% does tend to challenge you once in a while so if you want a pet this maybe isn’t the bull for you. This guy is smaller framed with exceptional width depth and length. If you are wanting to build some easy fleshing well-made kind of cows you may want to take a peek at Frank D Tank 0112. He tends to challenge you once in a while so if you want a pet this maybe isn’t the bull for you.

We decided to put Cadillac with a good jag of cows last year and I think that it really paid off for us. This is a tremendously deep sire group all the way through including in the yearling heifers, and this bull is no exception. A nice heifer bull here with a stacked pedigree.
This is a good medium framed heifer bull that is sure to do what you need him for. Don't know what is up with MGS but I have her as an Advocate daughter.

We were lucky enough to win this bull's dam at NILE from the Brawner family and she did a very good job on her first effort. This bull in is very thick and muscled with a lot of style and good structure. We are loving what we see from the Big Shooter 8003 sire and this guy does it all in a bit smaller frame.

Baller is a good chested wide made bull that has a lot of quality to him.
These Merlin Pride bulls are consistently thick and deep with a good deal of style and power.

Well last April 1 was kinda nasty bud, as a matter of fact it kind of felt like second February. When the weather’s turns like that in April it’s good to know that maternity levels are high in your cows, and this cow is a darn good momma. He’s got a tiny bit short ears because his momma and his drive saved the rest of him.

Brougham is a nice medium + framed bull with good length and style. His mother is one of the first Gunsmith cows and is doing a very solid job.

---

Try not to overlook this stout made good gaining Cadillac heifer bull. He is at the end because of his short ears and nothing else. Cadillac King is a really well-made bull with some go.

---

The Registered heifers will sell in groups of 5 & will offer choice. Heifers selling for under $1200 will not be registered.

TERMS & CONDITIONS

TERMS: The terms of the sale are cash. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released.

BIDDING DISPUTES: The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

PURCHASER’S RISK: Each animal will become the risk of the purchaser as soon as sold. Any animals left in the care of the Seller after the sale shall be reasonably cared for and Buyer will be advised of any health issues that should arise while in the Seller’s care.

ANNOUNCEMENTS: Changes of information contained in this catalog relating to animals offered for sale will be announced from the auction box and such announcements shall take precedence over printed material.

REGISTRATION CERTIFICATES: A certificate of registry and transfer will be furnished on all registered cattle, at the Buyer’s request and after settlement has been made. Certificated will specify exact percentage of Red Angus blood as is applicable. Please be sure to inform the clerk at the time of settlement how you would like the papers transferred.

IDENTIFICATION: Each registered animal carries a readable tattoo.

BREEDING GUARANTEED: All bulls are guaranteed to be breeders and have passed a fertility and soundness exam. All heifers are guaranteed open. Any claims for refund of adjustment must be made in writing within six months of the sale RATIO. In the event a bull is claimed to be a non-breeder, the purchaser may return the bull to the ranch of the Seller, if in good condition and complying with the health requirements of the Seller’s state. The Seller will be entitled to six months trial, following the return of the animal, in which to prove that the bull is a breeder. The Seller will be obligated to offer a suitable and comparable replacement, credit towards the purchase of another bull, or refund of the purchase price less any salvage value received by Buyer. Such replacement, credit, or refund shall in any case be deemed full satisfaction and settlement. If the Seller proves the bull to be a breeder, it shall be the obligation of the Buyer to take delivery of the animal at the Buyer’s expense.

LIABILITY: Neither owners, sale managers, clerks nor anyone connected with the sale assumes responsibility, legal or otherwise, for damage of any kind.

RETAINED INTEREST: Seller reserves the right to keep a breeding interest in any bull so designated in the catalog or during the auction. In the event Seller elects to collect semen from a designated bull, it will be done at Seller’s expense and during such time when purchaser is not using the bull for breeding.

IMPLIED WARRANTY: Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with the respect to the cattle being sold in this auction. The warranties set forth in the terms and conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the Buyer, or any party claiming through the Buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

CONTRACT: The above terms and conditions shall constitute a contract between the Buyer and Seller of each animal sold.
Happy Trails to You!
For More Information or Questions Call Brady at 406-353-7070
