Welcome to the Koenig Ranch 15th Annual Production Sale!

Thank you for your support and interest. For the past 27 years, we've been producing 100% IA Registered **Red Angus** seed stock in the tough range conditions of the Missouri Breaks. Developing our herd in Nature through the whole process allows them to **adapt**. Over time, the sought-after **Red Angus** traits of maternal efficiency, calving ease, growth, disposition, longevity, and phenotype, get better and the cattle get better - **hardy**. Nature has little use for high indexes, or freaks and faults caused by environment or genetics. They get identified early then reduced or eliminated. This year's offering adapted well to another year of record drought, 'hoppers, and -50° temperatures = **Survivability**. All cattle do well in a feed yard, where most numbers are calculated, foragers excel.

* Bred in native pastures. Natural service at 40 cows per bull requires fertility. AIing heifers and a few select cows only. Rotated often in all terrain and weather requires good feet and legs.

* All classes calved, weighed and tagged in pastures requires calving ease, mothering ability, vigor and good disposition.

* Weaned and developed in pastures. Trained on electric fence. Rationed long-stem hay, cow cake, and natural mineral (Redmond and New Life) for overall health when needed.

* Bulls get selected at 10 months (approximately 1/3 of the crop) to naturally mature and prove themselves. Tested and worked one week before sale day and hauled to Glasgow. Heifers from the heart of the herd.

We bring the best to you – fit, fertile and ready for breeding.

Sincerely, Arley & Francis Koenig

FERTILITY affects the economic viability of every beef operation, critical for sustainable, efficient, profitable beef production. RAAA was a leader in objectively describing traits related to reproduction and sustained fertility.

2018 RAA **STAY...Stayability** is the most important trait if your goal is developing cows that stay productive, thus increasing your productivity. Bulls with a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

KRP SIRES breed 40+ cows **Natural Service (NS)** yearly.

Bulls from the top 1/3 of the crop.

RED ANGUS MARKETING PROGRAMS

How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at (940) 226-4762 and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.

GARY LEE FLINT

Winnett, MT

Feb. 6, 1957 – Feb. 26, 2024

Gary was a good neighbor and friend. He's hauled cattle and grain for us since 1987, and trucked our sale cattle to Glasgow with care. He always showed up with a smile, a hand shake and a hug – ready to help.

PEARL F. NICKELS, 92

Fort Peck, MT

July 9, 1931 – Feb. 8, 2024

Customer and friend. "Ranching is my game," she'd say. Pearl never missed our sale at Glasgow. She always encouraged, inspired, supported and promoted us.

Her parting words, after a hug, were always, "See you boys next year!"
